

## On the forefront of sealing with the X2 combination

NCS offers the food/beverage and water industry an amazing rubber compound that carries both NSF-51 and NSF-61 certifications. That's right, a dual certification that also has many additional global certs to ensure your products are safe for manufacturers and consumers worldwide.

When it comes to restaurant equipment and supplies, food processing equipment, any water application and even our environment, we want to ensure that all health standards are met, which is why we offer this dual certification for molding rubber in these industries. *All parts are an EPDM peroxide cured and 70 Durometer.*

### NCS /70

**WRAS** (BS 6920) drinking water, cold and warm up to 85°C

**SAI GLOBAL** (AS/NZS 4020) drinking water, cold and warm up to 85°C

**UBA** drinking water, cold and warm up to 85°C

**DVGW-W270 E** drinking water

**DVGW W534** warm drinking water

**NSF** (Standard 61) drinking water, cold and warm up to 82°C; (Standard 51) food till 100°C

**ACS** drinking water

**ÖNORM B 5014-1** drinking water, cold and warm up to 85°C

**USP CLASS VI. KIWA** warm drinking water

**3-A Sanitary Standard N° 18-03**  
Class II

### NCS 3/70

**WRAS** (BS 6920) drinking water, cold and warm up to 85°C

**UBA** drinking water, cold and warm up to 85°C

**DVGW-W270 E** drinking water

**DVGW W534** warm drinking water

**NSF** (Standard 61) drinking water, cold and warm up to 82°C; (Standard 51) food till 100°C

**ACS** drinking water

**ÖNORM B 5014-1** drinking water, cold and warm up to 85°C

### NCS 5/70

**WRAS** (BS 6920) drinking water, cold and warm up to 85°C

**SAI GLOBAL** (AS/NZS 4020) drinking water, cold and warm up to 85°C

**UBA** drinking water, cold and warm up to 85°C

**DVGW-W270 E** drinking water

**DVGW W534** warm drinking water

**NSF** (Standard 61) drinking water, cold and warm up to 82°C; (Standard 51) food till 100°C

**KIWA** warm drinking water

**CLP** drinking water, cold and warm up to 85°C
